
CHAPTER 1

STORMWATER MANAGEMENT PLANNING AND DESIGN

Table of Contents

SECTION 1.1 THE NEED FOR STORMWATER MANAGEMENT

1.1.1 Impacts of Development and Stormwater Runoff	1.1-1
1.1.1.1 Development Changes Land and Runoff	1.1-1
1.1.1.2 Changes to Stream Flow.....	1.1-2
1.1.1.3 Changes to Stream Geometry	1.1-3
1.1.1.4 Impacts to Aquatic Habitat	1.1-3
1.1.1.5 Water Quality Impacts.....	1.1-4
1.1.1.6 Stormwater Hotspots	1.1-6
1.1.1.7 Effects on Lakes, Reservoirs and Estuaries.....	1.1-6
1.1.2 Addressing Stormwater Impacts	1.1-7

SECTION 1.2 STORMWATER MANAGEMENT STANDARDS

1.2.1 Overview	1.2-1
1.2.2 Minimum Standards for Development	1.2-1
1.2.2.1 Applicability.....	1.2-1
1.2.2.2 Minimum Stormwater Management Standards	1.2-2
1.2.2.3 Explanation of Minimum Standards.....	1.2-4

SECTION 1.3 UNIFIED STORMWATER SIZING CRITERIA

1.3.1 Overview	1.3-1
1.3.2 Description of Unified Stormwater Sizing Criteria	1.3-3
1.3.2.1 Water Quality	1.3-3
1.3.2.2 Channel Protection.....	1.3-5
1.3.2.3 Overbank Flood Protection.....	1.3-6
1.3.2.4 Extreme Flood Protection	1.3-7
1.3.3 Meeting the Unified Stormwater Sizing Criteria Requirements	1.3-7
1.3.3.1 Introduction	1.3-7
1.3.3.2 Site Design as the First Step in Addressing Unified Stormwater Sizing Criteria Requirements.....	1.3-8
1.3.3.3 Recommended Structural Stormwater Control Practices.....	1.3-9
1.3.3.4 Using Structural Stormwater Controls to Meet Unified Stormwater Sizing Criteria Requirements.....	1.3-11
1.3.3.5 Typical Steps in Addressing the Unified Stormwater Sizing Criteria.....	1.3-12

SECTION 1.4 STORMWATER BETTER SITE DESIGN

1.4.1 Overview	1.4-1
1.4.1.1 Introduction	1.4-1
1.4.1.2 List of Stormwater Better Site Design Practices and Techniques	1.4-2
1.4.1.3 Using Stormwater Better Site Design Practices	1.4-3
1.4.2 Better Site Design Practices	1.4-4
1.4.2.1 Conservation of Natural Features and Resources	1.4-4
1.4.2.2 Lower Impact Site Design Techniques	1.4-11
1.4.2.3 Reduction of Impervious Cover	1.4-19
1.4.2.4 Utilization of Natural Features for Stormwater Management	1.4-28
1.4.3 Better Site Design Examples	1.4-33
1.4.3.1 Residential Subdivision Example 1	1.4-33
1.4.3.2 Residential Subdivision Example 2	1.4-33
1.4.3.3 Commercial Development Example	1.4-33
1.4.3.4 Office Park Example	1.4-34
1.4.4 Site Design Stormwater Credits	1.4-39
1.4.4.1 Introduction	1.4-39
1.4.4.2 Stormwater Credits and the Site Planning Process	1.4-40
1.4.4.3 Site Design Credit #1: Natural Area Conservation	1.4-41
1.4.4.4 Site Design Credit #2: Stream Buffers	1.5-42
1.4.4.5 Site Design Credit #3: Vegetated Channels	1.5-43
1.4.4.6 Site Design Credit #4: Overland Flow Filtration / Groundwater Recharge Zones	1.5-44
1.4.4.7 Site Design Credit #5: Environmentally Sensitive Large Lot Subdivisions	1.5-45

SECTION 1.5 STORMWATER SITE PLANNING

1.5.1 Stormwater Management and Site Planning	1.5-1
1.5.1.1 Introduction	1.5-1
1.5.1.2 Principles of Stormwater Management Site Planning	1.5-1
1.5.2 Preparation of Stormwater Management Site Plans	1.5-2
1.5.2.1 Introduction	1.5-2
1.5.2.2 Pre-consultation Meeting and Joint Site Visit	1.5-3
1.5.2.3 Review of Local Requirements	1.5-3
1.5.2.4 Perform Site Analysis and Inventory	1.5-3
1.5.2.5 Prepare Stormwater Concept Plan	1.5-4
1.5.2.6 Prepare Preliminary Stormwater Site Plan	1.5-5
1.5.2.7 Complete Final Stormwater Site Plan	1.5-7
1.5.2.8 Obtain Non-Local Permits	1.5-7
1.5.3 Stormwater Planning in the Development Process	1.5-8
1.5.3.1 General Site Development Process	1.5-8
1.5.3.2 Stormwater Site Planning and Design	1.5-8

REFERENCES

List of Tables

1.1.1-1	Summary of Urban Stormwater Pollutants.....	1.1-5
1.3.1-1	Summary of the Statewide Stormwater Sizing Criteria for Stormwater Control and Mitigation	1.3-1
1.3.3-1	Reductions or “Credits” to the Unified Stormwater Sizing Criteria through the Use of Better Site Design Practices.....	1.3-8
1.3.3-2	Suitability of Structural Stormwater Controls to Meet Unified Stormwater Sizing Criteria	1.3-11
1.4.2-1	Riparian Buffer Management Zones	1.4-7
1.4.2-2	Conventional Minimum Parking Ratios	1.4-22
1.4.4-1	Summary of Better Site Design Practices That Provide for Site Design Stormwater Credits	1.4-39
1.4.4-2	Integration of Site Design Credits with Site Development Process	1.4-40
1.5.3-1	Stormwater Planning in the Site Development Process	1.5-8

List of Figures

1.1.1-1	Clearing and Grading Alter the Hydrology of the Land	1.1-1
1.1.1-2	Impervious Cover Increases Runoff Peak Flows and Volumes While Reducing Recharge	1.1-1
1.1.1-3	Hydrograph Under Pre- and Post-Development Conditions.....	1.1-2
1.1.1-4	Changes to a Stream’s Physical Character Due to Watershed Development.....	1.1-3
1.3.1-1	Representation of the Unified Stormwater Sizing Criteria	1.3-2
1.3.1-2	Unified Sizing Criteria Water Surface Elevations in a Stormwater (Wet) Pond	1.3-2
1.3.2-1	Water Quality Volume versus Percent Impervious Area.....	1.3-4
1.3.3-1	Typical Stormwater Management System Design Process.....	1.3-12
1.4.1-1	Stormwater Better Site Design Process.....	1.4-3
1.4.2-1	Example of Natural Feature Delineation	1.4-4
1.4.2-2	Delineation of Natural Conservation Areas.....	1.4-5
1.4.2-3	Riparian Stream Buffer.....	1.4-6
1.4.2-4	Three-Zone Stream Buffer System	1.4-7
1.4.2-5	Floodplain Boundaries in Relation to a Riparian Buffer	1.4-8
1.4.2-6	Flattening Steep Slopes for Building Sites Uses More Land Area Than Building on Flatter Slopes	1.4-9
1.4.2-7	Soil Mapping Information Can Be Used to Guide Development.....	1.4-10
1.4.2-8	Development Design Utilizes Several Lower Impact Site Design Techniques.....	1.4-11
1.4.2-9	Preserving the Natural Topography of the Site.....	1.4-12
1.4.2-10	Subdivision Design for Hilly or Steep Terrain Utilizes Branching Streets From Collectors that Preserves Natural Drainageways and Stream Corridors.....	1.4-13
1.4.2-11	A Subdivision Design for Flat Terrain Uses a Fluid Grid Layout that is Interrupted by the Stream Corridor.....	1.4-13
1.4.2-12	Guiding Development to Less Sensitive Areas of a Site	1.4-14
1.4.2-13	Establishing Limits of Clearing	1.4-15
1.4.2-14	Example of Site Footprinting	1.4-15
1.4.2-15	Open Space Subdivision Site Design Example	1.4-17
1.4.2-16	Aerial View of an Open Space Subdivision.....	1.4-17
1.4.2-17	Example of Reducing Impervious Cover.....	1.4-19
1.4.2-18	Potential Design Options for Narrower Roadway Widths	1.4-20
1.4.2-19	Building Up Rather Than Out Can Reduce the Amount of Impervious Cover	1.4-21

1.4.2-20	Structured Parking at an Office Park Development	1.4-23
1.4.2-21	Grass Paver Surface Used for Parking	1.4-23
1.4.2-22	Reduced Impervious Cover by Using Smaller Setbacks	1.4-24
1.4.2-23	Examples of Reduced Frontages and Side Yard Setbacks	1.4-25
1.4.2-24	Nontraditional Lot Designs	1.4-25
1.4.2-25	Four Turnaround Options for Residential Streets	1.4-26
1.4.2-26	Parking Lot Stormwater “Island”	1.4-27
1.4.2-27	Residential Site Design Using Natural Features for Stormwater Management....	1.4-28
1.4.2-28	Use of a Level Spreader with a Riparian Buffer	1.4-29
1.4.2-29	Example of a Subdivision Using Natural Drainageways for Stormwater Conveyance and Management	1.4-30
1.4.2-30	Using Vegetated Swales Instead of Curb and Gutter	1.4-31
1.4.2-31	Design Paved Surfaces to Disperse Flow to Vegetated Areas.....	1.4-32
1.4.3-1	Comparison of a Traditional Residential Subdivision Design with an Innovative Site Plan Developed Using Better Design Practices	1.4-35
1.4.3-2	Comparison of a Traditional Residential Subdivision Design with an Innovative Site Plan Developed Using Better Site Design Practices.....	1.4-36
1.4.3-3	Comparison of a Traditional Commercial Development with an Innovative Site Plan Development Using Better Site Design Practices.....	1.4-37
1.4.3-4	Comparison of a Traditional Office Park Design with an Innovative Site Plan Developed Using Better Site Design Practices	1.4-38
1.5.2-1	Composite Analysis.....	1.5-4
1.5.3-1	Typical Site Development Flowchart.....	1.5-8
